Summary

A highly motivated and accomplished Software and Data Engineer with a 3.91 GPA and a track record of winning multi-university hackathons. Demonstrated success in wearing many hats as the sole engineer for Northpoint Property Management, the 7th largest in the US. Architected and single-handedly wrote 95% of the company's codebase, including the database, internal tools, a public-facing API with row-level security, and automations that saved hundreds of operational hours. Seeking to apply a versatile skill set in software, database, automation, and integration engineering to solve complex challenges and drive innovation.

Professional Experience

Lead Software & Data Engineer | Northpoint Property Management | Salt Lake City, UT *April 2025 - Present*

- Functioned as the sole software engineer, responsible for the entire software development lifecycle for the 7th largest property management company in the United States.
- Architected, developed, and maintained 95% of the company's production code, including building the primary database schema from the ground up.
- Engineered a suite of internal web and mobile applications to streamline property management, maintenance, and financial operations.
- Developed and deployed a secure, public-facing REST API, implementing robust row-level security to protect sensitive data.
- Created numerous automation scripts and processes that saved hundreds of employee hours per month by eliminating manual tasks.

Consulting Software Engineer | VanOrdenSolutionsLLC | Salt Lake City, UT *March 2024 - April 2025*

- Provide contract-based software and data engineering services to various clients, including startups like Argo Shipping.
- Specialize in cloud integration (Azure), data pipeline development, and custom application solutions to meet client needs.

Data Engineering Intern | The Church of Jesus Christ of Latter-day Saints | Salt Lake City, UT
January 2023 - April 2024

- Resolved hundreds of bugs and implemented new features across more than 130 global education system reports using SQL, SSRS, and Power BI.
- Played a key role in a major project to migrate legacy SSRS reports to a modern Power BI platform, enhancing data visualization and accessibility for worldwide stakeholders.
- (Continued as a contractor via TEKsystems from Jan 2024 - Apr 2024 to complete project milestones).

Analytics Consultant Intern | Eide Bailly LLP | Remote *January 2024 - October 2024*

- Served as a client-facing consultant, helping multiple businesses define requirements and develop data solutions.
- Designed and built custom dashboards and reports in Power BI and SSRS to provide actionable insights into client data.
